## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1, 5-9, 12, 16-20, 23, and 24 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art fails to teach or suggest some of the limitations found in independent claims 1, 12, 23, and 24. With respect to independent claims 1 and 12, the prior art of record fails to teach or suggest the external feedback element comprising a ring resonator and a Bragg grating in a single element. Bernard et al '342 teaches a similar system to that of the present invention. However, Bernard teaches a reflective mirror (16) rather than a Bragg grating. Furthermore, the reflective element of Bernard is not formed in the same element/medium as the ring resonator. With respect to independent claims 23 and 24, the prior art of record fails to teach or suggest coupling the external feedback element to a waveguide, wherein the waveguide is made of silicon-oxide and silicon-oxinitride. Therefore, independent claims 1, 12, 23, and 24, as well as all dependent claims, are allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Citation of Pertinent References***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patent application publications do not qualify as prior art; however, they further show the state of the art with respect to single external feedback elements comprising a ring resonator and a Bragg grating:

- a. U.S. Patent Application Publication US2003/0219045 A1 to Orenstein et al.
- b. U.S. Patent Application Publication US2004/0136412 A1 to Jones
